SUMMARY

- Software engineer with ~5 years of experience across consulting, retail, consumer goods, real estate and fintech, building fullstack TypeScript products.
- Proficient in Node.js, React, TypeScript, AWS (Lambda, DynamoDB, SQS) and Python, from monolith decomposition to serverless backends.
- Senior Consultant at Thoughtworks, delivering for international clients in distributed teams.
- Documentation-first collaborator: specs, architecture decision records (ADRs) and CI quality gates keep decisions explicit and reviewable.
- Built and operate Lucky, a Discord bot serving 50+ servers and 100k+ members, and raised retrieval quality by 46% (Hit@5 from 0.587 to 0.86) in hitgate, an open-source RAG evaluation tool on PyPI.

SKILLS

- **Proficient:** TypeScript, JavaScript, Node.js (Express), React, Next.js, Python, REST API design, AWS (Lambda, API Gateway, DynamoDB, SQS, EventBridge, S3, CloudWatch), PostgreSQL, Prisma, Docker, GitHub Actions, Jest, Vitest, Playwright, LLM integrations, RAG, MCP servers, AI-assisted development (Claude Code, GitHub Copilot, Cursor)
- **Intermediate:** C#, .NET Razor Pages, Observability (Splunk, Grafana, Prometheus, Sentry), Jenkins, Cloudflare Workers, Redis, Terraform, SQL Server, Tailwind CSS
- **Beginner:** Go, Rust, Java (Spring Boot), Kubernetes (k3s), GraphQL, MongoDB

WORK EXPERIENCE

Thoughtworks (Brazil, remote) · 01/2026 to present
Senior Consultant, Software Developer

- Delivered reporting features for a restaurant-technology client by building React and Node.js components in a distributed delivery team (07/2026 to 09/2026).
- Contributed to a digital payments platform for a global cosmetics retailer (05/2026).
- Applied AI-assisted development with code review and validation of every generated change.

CI&T (remote) · 01/2024 to 12/2025
Software Engineer, Fullstack

- Built, maintained and deployed backend services with Node.js (Express) and AWS Lambda, through Jenkins pipelines, for the mobile app and the product-personalization platform of a global consumer brand.
- Collaborated daily in a multi-vendor, multinational delivery team with engineers from Brazil, India and Pakistan.
- Built frontend features with C# and Razor Pages for a US financial services company, in a team spread across the US, Colombia and Brazil (2025).
- Shortened incident diagnosis for distributed services by implementing Splunk-based observability and monitoring.
- Reduced regressions on REST APIs and microservices by expanding automated test coverage with Mocha and Jest in Jenkins CI pipelines.

TRINUS CO. (Goiania, remote) · 11/2022 to 12/2023
Software Developer, Fullstack

- Reached 550+ employees with an internal Kanban workspace built with React and Node.js, centralizing task tracking.
- Enabled parallel delivery across teams by decomposing the platform from a monolith into TypeScript/Node.js microservices with shared typed contracts.
- Reduced manual work by automating business processes with Python, Power Automate and Selenium.

V.SANTANA (Goiania, remote) · 12/2021 to 11/2022
Software Developer, Fullstack

- Delivered 10+ fullstack applications (ERP, educational and institutional) for local businesses with React and Node.js, from requirements to deployment.
- Replaced manual workflows for local businesses by building custom ERP systems with React and Node.js.

SELECTED PROJECTS

- **Lucky:** Discord bot serving 50+ servers and 100k+ members, with a React dashboard, listed on top.gg. TypeScript monorepo (discord.js, Prisma, Redis/BullMQ, Sentry) with staging and production deploys, migration gate and mutation testing in CI.
- **hitgate:** Retrieval regression gate for RAG systems (Python, published on PyPI). Hybrid BM25 + dense retrieval with label-free evaluation; raised Hit@5 from 0.587 to 0.86.
- **sharekit:** CLI to share and install AI coding setups with preview and rollback (TypeScript, published on npm and PyPI), with security and cross-platform tests.

EDUCATION AND CERTIFICATIONS

- Bachelor's Degree in Computer Systems, FIAP (2025)
- AWS Certified Cloud Practitioner (2026)
